Media Pack 2012

The food industry

is one of the most dynamic and essential sectors within Europe and the world today. Industry, manufacturing, production and consumer awareness of hygiene and safety issues, combined with the advancement and generation of new products or processes, ensures that ongoing development of related science and technology has never been greater, making Food Science & Technology magazine a vital source of information and debate.

Food Science & Technology magazine...

Is a market leading quarterly publication written and approved by world renowned professionals and scientists covering all sectors and fields which make up and address the complex and important issues that face food science and technology today.

... aims to address all the key issues that face the industry, with many of the articles offering insights into these complex topics being written by key figures and industry experts.

What is the Institute of Food Science and Technology?

IFST is the leading independent qualifying body for food professionals in Europe and the only professional body in the UK concerned with all aspects of food science and technology. IFST aims to:

- Benefit the public supply of safe, wholesome, nutritious tasty and attractive food through the application of sound science and technology;
- Develop and communicate the knowledge underlying food science and technology, and further the education of food scientists and technologists;

- Safeguard the public by defining, promoting and upholding professional standards of competence, integrity and ethical behaviour; and
- Maintain these standards by encouraging members to continue their professional education and development throughout their careers.

Who receives Food Science and Technology?

Food Science & Technology magazine reaches the most influential people in this key sector of the food industry, including all 3500 members of the Institute of Food Science and Technology, senior management and purchasing decision makers. The distribution database has been compiled using IFST data and also using Excel Publishing Co Ltd's substantial database of companies

involved within the catering and hospitality industries.

As a result of this incisive distribution, the readership are assured that Food Science & Technology magazine reaches those who have influence over the purchase of products and services throughout this vital and thriving industry.

Ideal showcase

Because *Food Science & Technology* has the weight behind it of the food industry's foremost academics, combined

with the weight of executives from the leading food-producing companies throughout Europe, the magazine is the ideal showcase for those offering services and new products and technologies.

Throughout each year there are editorial features that complement every commercial area of this sector of the food industry, features that are relevant to your area of business.
